

Our World....

The next phase!!!

I want to update you

- *Imo Letts visit – Planting trees at Burrowmoor*
- *Eco Club visit*
- *Recycling at Burrowmoor*

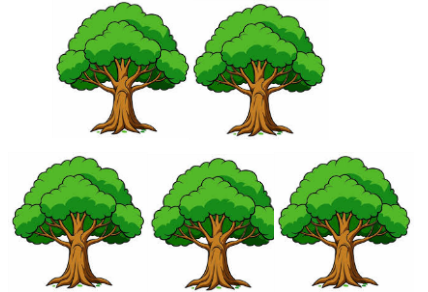

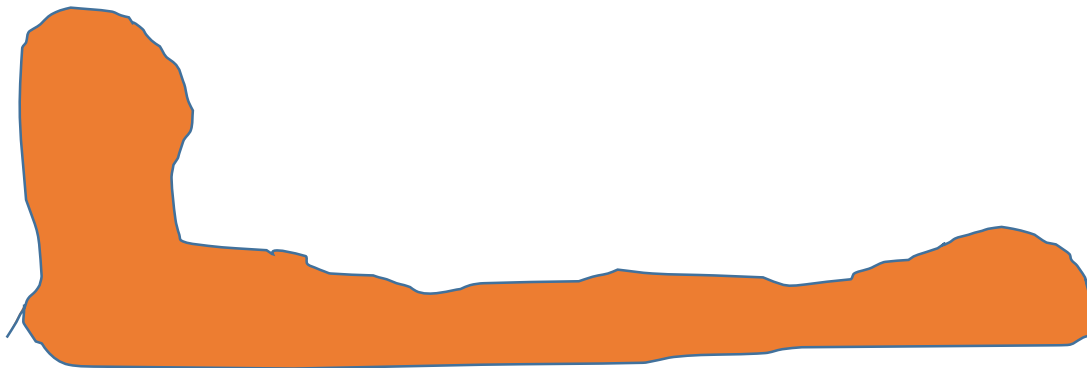

Imo Letts Visit

- What does Imo do?
- What is her title?

Planting Trees at Burrowmoor

Eco Club visit to AdaptBiogas

Life at the Biogas Farm

Process on the farm

- Farm land with 1200 cows.
- They live in pens outside, they lie on grass and eat grass all day
- They are weighed everyday
- The waste from them and the dirty grass is moved out
- It is put into a gas dome, with other materials, vegetables, foodwaste, grass waste and GAS / ELECTRICITY is generated for them to sell
- They also sell the fertilizer that comes out of the domes
- They sell the liquid fertilizer too
- The cows also go to become meat

Summary

- Murrow produces electricity from waste
- Power from different sources is becoming more common
- How does it work?
